(54) WASTE TREATING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a waste treating system which can safely and surely treat infectious medical wastes without entailing a cost increase.

SOLUTION: The materials to be treated are fed together with liquid for boiling into a waste feeding vessel (80) and are housed into a boiling and carbonizing furnace (10) of a hermetic structure. The inside of the boiling and carbonizing furnace is maintained in a reduced pressure state and the temperature in the boiling and carbonizing furnace is raised to boil the liquid for boiling in the waste feeding vessel, by which the materials in the waste feeding vessel are sterilized. The materials are carbonized after the liquid for boiling evaporates.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
